**The most precious gift that anyone can bring to State Monument Kūkaniloko Birthstones is wai - water.** There is no water source onsite. The grounds are completely dependent on the *ua* - rains. Any water that you can bring down to the site to water the plants there is much appreciated. Summer is upon us. We are thankful for your help. **The Science of Semiotics: communication through signs and symbols.** Hieroglyphs, petroglyphs, geoglyphs and megaliths are global forms of messages left from those who walked our planet long before us. In alignment with this science is *Piko 'o Kūkaniloko*. Symbols left to us on the faces of our *pōhaku* not only reveal through their embedded images but expand their stories when in reflection of the elements of Mother Nature. The science of semiotics is enhanced by positions of the sun, the moon, stars, constellations and planets. Further complimented by the rain, the shadows cast, the time of day, cardinal directions and human perception. Inaudibly, they echo the *mo'olelo* – traditional comprehension - of the seen and unseen of our *Ka Po'e Kahiko*. The generational continuum awaits this wisdom and knowledge. Our *Piko Listening Journeys* answer their petition. **ALOHA** is forever...and **FOREVER** is the old way of our ancients...eō mai la
